

FicusRx Clinicians is a clinical pharmacist group that works in collaboration with providers to:

- Optimize patient medication regimens
- Perform medication reconciliation with EHR and after transitions of care
- Address polypharmacy and drug related issues
- Assess medication adherence
- Decrease hospital readmission rates and improve HEDIS scores
- Address CMS-mandated MIPS compliance and quality initiatives
- Manage Medication use by seniors and patients with complex drug regimens
- Assist with compliance activities mandated by various quality components of MIPS reimbursement
